

TRUE OR FALSE?

Wiggle out their math worries with a fun game of true or false!

Say a math fact (e.g., $2+2=4$). If the players think the answer is true, they have to jump to the sky. If they think it is false, they have to stretch to their toes. For more fun, do the action too when you give the answer.

Good for all ages (make the questions more challenging for older kids).
